5 FUN FACTS ABOUT MANUFACTURING IN ADAMS COUNTY

1. The average manufacturing employee earns $49,682 annually in Adams County.
2. Adams County has 115 manufacturers creating unique, fascinating, technology-driven products!
3. Manufacturing supervisors can earn $61,000 annually in Adams County.
4. Printing press operators can earn an average of $42,000 annually in Adams County.
5. There is a high demand for manufacturing workers, especially those with computer and technology skills.

WHAT'S SO COOL ABOUT MANUFACTURING?™

Coordinated by MANTEC (Manufacturing Consulting Services South Central PA)

This program raises awareness among students and parents about cool career paths and high pay available in today's advanced manufacturing sector!

MANTEC works with manufacturers every day and hears stories about the need for qualified workers and the concern of an aging workforce. Today's students are needed, for tomorrow's jobs!

Here's how YOU can get involved!

Teams of middle school students visit manufacturing facilities, armed with Go Pro cameras, to film products being created right before their eyes. Students produce videos for the "What's So Cool About Manufacturing?" contest! About a dozen student teams receive awards in different categories.

Congrats to local winners in 2018!

- Outstanding Overall Program Winner: Conewago Valley School District featuring Ox Industries
- Viewers' Choice & Outstanding Cool Winner: Hanover Public School District featuring Legacy Athletics
